
PROFESSIONAL SUMMARY

AI & Full Stack Engineering undergraduate with hands-on experience in agentic AI, machine learning, and scalable web applications.

TECHNICAL SKILLS

- **Programming Languages** : Python, C#, JavaScript, HTML/CSS, SQL, Java Basics
 - **Frameworks & Libraries** : LangChain, LangGraph, Crew AI, AutoGen, NumPy, Pandas, OpenCV, Scikit-learn, TensorFlow, PyTorch, Matplotlib, Node.js, React js, Type Script
 - **Tools & Technologies** : MySQL, Git, RESTfulAPIs, Mongo DB, Postman API, J Meter, Zap, Light House
 - **Additional Skills** : GENAI, AgenticAI, DBMS, CI/CD
-

PROFESSIONAL EXPERIENCE

Nexus Horizon - AI Developer | Tester | Project: Faculties.ai **Sep 2025 - Apr 2026**

- Faculties.ai required a scalable and responsive AI-driven academic workflows.
- Built user-friendly interfaces and integrated them with backend and AI services, reducing API response handling errors by 30%.
- Developed and integrated AI-driven applications using Python, LLMs, Agentic AI workflows.
- Collaborated with UI/UX, backend, and AI teams to deliver responsive, production-ready AI solutions.

SNS Square - Full Stack AI Developer | Tester | Projects: AI Exam **Aug 2024 - Sep 2025**

Analyzer, Gen AI Suite , Aggregator

- Multiple AI-based enterprise platforms needed full-stack development and accurate requirement analysis.
- Develop, test, and analyze requirements for assessment and document platforms.
- Built full-stack modules, implemented AI logic, performed testing, and aligned business needs.
- Increased assessment accuracy by 15% and improved project success by 10%.

Cognifyz Technologies - AIML Engineer | Project: Electro Bot , Collexa.ai **Oct 2023 - Jun 2024**

- Systems required intelligent automation and improved AI response accuracy.
 - Develop and optimize AI models for personalization, fraud detection, and knowledge retrieval.
 - Built recommendation and fraud detection models, trained SLMs, and implemented RAG pipelines, increasing response relevance by 30% and reducing average query resolution time by 40%.
 - Enhanced system intelligence, accuracy, and reduced manual intervention.
-

PROJECTS

- **Loan Eligibility Checker** - AI-based loan approval system that reduced manual verification by 12% and improved screening accuracy by 15%.
 - **Researcher AgentX** - Multi-agent AI researcher improving research efficiency by 18%.
 - **Exam Paper Analyzer** - AI-powered exam evaluation system that reduced evaluation time by 30%.
 - **Project Management Agent** - AI-driven system for task, chat, and email automation, improving team productivity by 40%.
 - **Agentium** - Python library for agentic AI systems, reducing development time by 55%.
-

EDUCATION

B.Tech Artificial Intelligence & Machine Learning

Nov 2022 - Jun 2026

- **SNS College of Technology**, CGPA: 8.38/10
-

AWARDS AND CERTIFICATION

- **Salesforce** AI Associate and Agentforce Specialist, both completed with scores above **80%**.
- **Oracle** AI Foundations Associate completed with **92%** and **Postman** AI Student Expert certified.
- **NPTEL** IoT 4.0 Certification , **NASSCOM** Digital edge completed with a score of **81%**.
